DECLARATION

Dear Sirs,

We hereby declare that our valve regulated lead-acid batteries, with labels VISION and LEADER, are classified into UN No.2800, that is, "Batteries, wet, non-spillable, electric-storage", and are designed to prevent leakage of the electrolyte. They do not have any free liquid to flow in the case. So, the electrolyte will not flow from the cracked case at a temperature 55 degrees C.

In case our valve regulated batteries are packed for transportation, the terminals of them are protected from short circuit.

For above reasons, we also declare that our valve regulated lead-acid batteries satisfy the clause A67 of IATA.

For and on behalf of
SHENZHEN CENTER POWER TECH CO., LTD.
